IH (Induction Heating) features

Safe Flameless

CleanFlat top plate for easy care

Highly-efficient Efficient heating

■ Home-friendly Comfortable cooking with less room temperature rise even in summer

■ Earth-friendly Energy-save heating with zero carbon dioxide emissions in home

IR sensor

Provided for the left IH heater, the IR sensor detects the temperature of the bottom of cookware and controls the heat level.

Safety Precautions

MARNING

Failure to follow these instructions may cause death or serious injury.

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to make sure that they do not play with the appliance. Keep infants away from the appliance.
- Do not deep-fry with this appliance.
 Overheated oil may catch fire when you cook deep-frying because this appliance does not have the deep-frying temperature control function.
- Do not place combustible materials near the appliance. They may cause fire.
- Observe the following to keep the IR sensor functioning properly.
- Make sure that the cookware completely covers the IR sensor.
- For stir-flying and pan-frying, wipe water off the top plate and the pan both inside and out.

 Failure to observe these warnings may cause an operation error of the IR sensor, leading to oil overheating and resulting in fire.
- Set the heat level to \boxed{b} or less for preheating to prevent the pan from overheating.

Oil temperature may rise too high, resulting in fire.

- •Do not leave the appliance unattended while cooking.
- Stir liquids, such as soup and stewed food, before heating. Otherwise, liquids may splatter and cause burns or injuries, or pot may jump and damage the top plate.
- •Do not touch the top plate during or after use. Be especially careful when the high temperature caution light is illuminating or flashing.
- Do not place explosive objects, such as portable gas burners, steel cylinders and canned goods, on or near the appliance. If they are mistakenly heated, they may explode.

- Do not let metallic objects, such as knives, forks, spoons, lids, aluminum foil/tray, retort pouch, magnetic rings, watches or accessories, be placed on or near the top plate, or touch the cookware while the IH heater is operating.
 They may get hot, causing burns or injuries.
- •Do not apply high pressure to or drop things on the top plate.

The top plate may crack, causing an electric shock.

WARNING: If the top plate is cracked, do not touch it and turn off the main power switch to avoid the possibility of electric shock.

- Do not disassemble, repair, or modify the appliance. For repairs, contact the dealer where you purchased the appliance.
- After use, turn off the appliance by its control and do not rely on the pot detector (safety features).
 When the appliance will not be used for a long period of time, turn off the circuit breaker.
- In case of malfunction or breakdown, immediately stop using the appliance.

Turn off the main power switch and circuit breaker, and then contact the service agent.

Failure to do this may cause smoke, burns, and electric shock.

Breakdown examples:

- Smells of something burning come from the appliance.
- You feel electricity when touching the top plate.
- The top plate is cracked.
- The power cord is extremely hot.
- The electricity shuts off when the power cord is moved.
- → If the power cord is damaged, it must be replaced by the manufacturer or its service agent or a similar qualified person in order to avoid a hazard.

Safety Precautions

A CAUTION

Failure to follow these instructions may cause injury or property damage.

- Do not use high heat level for preheating in the following cases to prevent pans from turning red-hot or deforming.
- When a small amount of oil is used
- When small, light, thin-bottomed or curved-bottomed pans are used
- If you are wearing a medical device (such as a pacemaker), consult your doctor.

The operation of the appliance may affect the medical device.

- Ensure the cookware is stable.

 Dropped cookware may cause injuries or burns.
- Do not place paper or dish towels under the cookware. They may get scorched due to the heated cookware.
- Do not heat empty cookware or overheat ingredients. The ingredients may burn and the cookware may be damaged.
- Do not use the appliance for purposes other than cooking. This may cause overheating or malfunction, resulting in fire.

General Precautions

- The appliance is not intended to be operated by means of an external timer or separate remote-control system.
- •The appliance emits magnetic lines of force. Do not place anything affected by magnetism close to the appliance.
- A radio, TV, hearing aid, etc. may be affected by noise interference.
- Data of a cassette tape, automatic turnstile ticket, bank card, etc. may be lost or damaged.
- Do not use other IH cooking appliances, such as IH rice cooker or portable IH cooktop, on the top plate.

Electro-magnetic waves generated by such appliances may damage the IH heater.

• Do not place seasoning or food in the cabinet under the appliance.

They may be spoiled by the exhaust heat.

- •If the top plate is stained by acidic foods, such as vinegar, jam, or lemon juice, immediately wipe it off.

 Otherwise, the top plate may be discoloured.
- Do not put water on or place anything on the operation panel. The operation panel keys may malfunction.
- Do not clog up the intake or exhaust vent.

 The filter clog detection for the intake and exhaust vents may be activated, and automatically shut off the main power.

Safety features

The following functions are equipped.

Heating stops when an abnormality is detected.

- Undetected pot auto shutoff (P.22)
- Small object auto shutoff (P.22)
- Empty pot auto shutoff (P.21)
- Forgotten-OFF auto shutoff (P.19)

The main power is turned off if no key operation is performed.

Main power switch auto shutoff (P.19)

Heating power is reduced when the temperature rises too high.

Overheating prevention function (P.20)

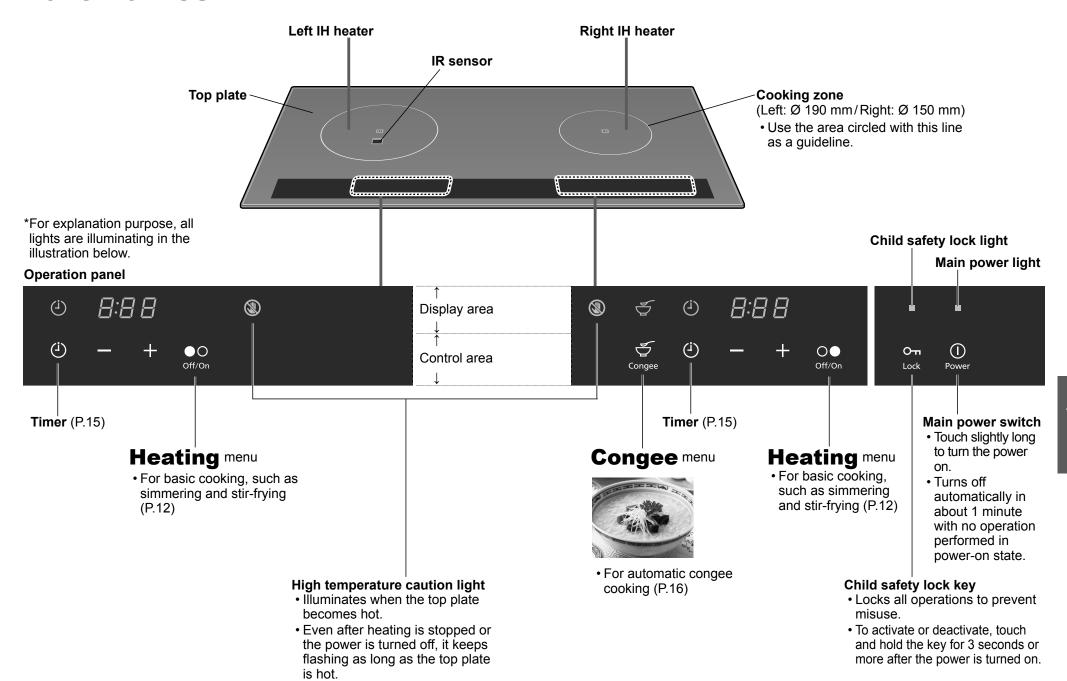

The light illuminates when the top plate is hot.

• High temperature caution light (P.8)

The operation panel can be locked to prevent misuse of the appliance.

• Child safety lock (P.9)

Part Names

Types of Usable Cookware

	Usable	Not usable
Material	Iron/ Cast iron Enamelled iron Magnetic stainless steel (Magnets stick to the bottom.)	Aluminum/Copper Heat-resistant glass Ceramic and earthenware Nonmagnetic stainless steel (Magnets do not stick to the bottom.) Heating may be impossible or heating power may be reduced with these types of cookware.
Bottom shape	Flat bottom that uniformly contacts with the top plate	Round bottom Bottom with legs or protrusions Thin bottom *If cookware with 3 mm or more of curved bottom is used, the safety features may not function properly, heating power may be reduced, or the cookware may not be heated.
Size	Bottom diameter: 12 cm or more Bottom diameter	Bottom diameter: less than 12 cm Bottom diameter

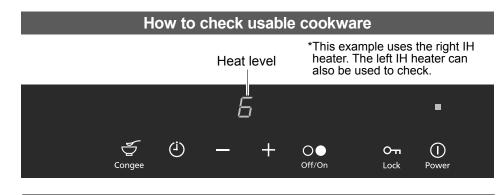

Note

- Do not heat and scorch empty enamelware.

 Enamel coating may melt and damage the top plate.
- Do not use ceramic ware and earthenware even if they are made for induction heating.

This appliance may malfunction, heating power may be reduced automatically, or heating may be stopped by the safety features.

• The Congee menu has other restrictions. (P.16)

Place the cookware filled with about 1 cup of water on the IH heater.

2

Touch to turn the power on.

3 O off/On

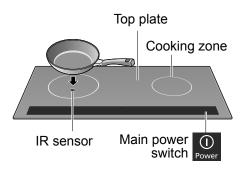

Touch and check the heat level indication.

- Lighting $\boxed{5}$: Usable.
- Flashing _: Not usable.

Touch to stop heating.

Basics

How to set cookware

Place the cookware in the centre of the cooking zone.

For the left IH heater

- Confirm the IR sensor is completely covered by the cookware.
- Otherwise, the IR sensor does not operate properly.
- For stir-frying and pan-frying. wipe water off the top plate and the pan both inside and out. Otherwise, the IR sensor does not detect the temperature of the bottom of the pan correctly.

What is the IR sensor?

Detects the temperature of the bottom of cookware and adjusts the heat level. Prevents overheating, or restores the temperature to the original level after the temperature drops by adding ingredients.

How to turn the power on

 Touch the main power switch slightly long.

Note

 The appliance automatically turns off in about 1 minute with no operation performed in power-on state.

Heating Menu

Cooking tips

Adjust the heat level according to how ingredients are cooked.

Warning

- Stir liquids, such as soup and stewed food, before heating. Otherwise, liquids may splatter and cause burns or injuries, or pot may jump and damage the top plate.
- Set the heat level to
 ☐ or less for preheating to prevent the pan from overheating.

Oil temperature may rise too high, resulting in fire.

Caution

 When preheating the pan with a small amount of oil, do not use high heat level.

The pan may become red-hot or deform.

Note

 When heating for 45 minutes or more, use the timer so that the "Forgotten-OFF auto shutoff" is not activated.

To use the timer, see page 15.

- Touch to turn the power on. Power
- Touch to start. Off/On
 - the heat level. (P.14)

- Touch to adjust Default heat level:
 - Heat level range:
 - to 🖳 (Left IH heater)
 - to 🛭 (Right IH heater) • To lower the level rapidly: Touch and hold.
 - ■To use the timer See page 15.

When cooking is complete,

Touch to stop heating.

Heating Menu

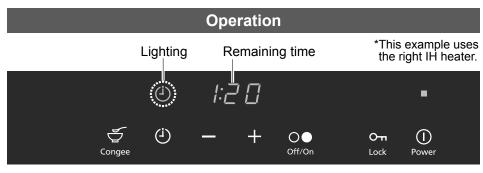

Heat level adjustment guideline

Heat level			Low		Medium			High		
Heat le	vei	1	2	3	4	5	6	7	8	9
Power consumption	Left IH heater	120	235	370	500	700	1000	1450	2000	2800
[W]	Right IH heater	120	235	370	500	700	1000	1450	1800	_
Simmerin	g			soup	Light s	<u> </u>	3			
			Silli	mer	SIII	nmer lig	riuy			1/-1
								Pasta,	Vegeta Boil	ables
Boiling										t water
									110	Boil quickly
Warming		Keep warm	Reh	neat						
Steaming								Steam	ed mea	at bun
9									with high	
Pan-frying	g			Hamb	urger n-fry slo	Wlv			Steak	quickly
Stir-frying)							Vegeta Stir		

Note

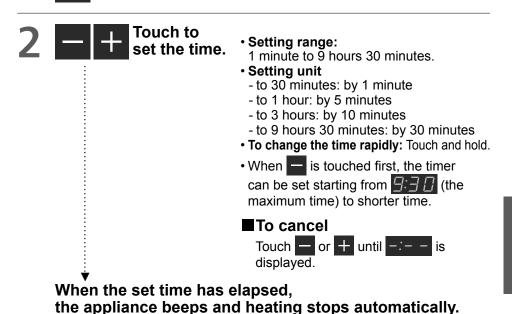

Heat values for cookware vary according to the material.
 Check and adjust the heat levels frequently.

Timer

The timer can be set for the Heating menu.

Start cooking with the Heating menu, and then Touch.

Note

• The remaining time is displayed by touching (4) while the heat level is being displayed. (approx. 10 seconds.)

Congee Menu

Congee with chicken & dried scallops

Ingredients	4 servings	2 servings
Dried scallops	20 g	10 g
Fresh chicken	200 g	100 g
Rice	170 g	85 g
Water (including soaking water)	2.2 L	1.2 L
Ginger (chopped)	1 slice (15 g)	1/2 slice (7.5 g)
Salt	tspn. 1	tspn. 1/2

* Topping: Century egg, coriander, welsh onion, etc.

Cooking method

- 1 Soak dried scallops in water until soft, then cut into small pieces.
 - Reserve the soaking water for congee.
- 2 Peel the skin off of chicken and remove the fat. Wash and dry the chicken, and then rub the chicken with extra salt.
- 3 Wash rice.
- 4 Place ingredients other than chicken in a pot, and make the surface flat. Place the block of chicken on the top.
 - For 2 servings, cut the chicken into size to be soaked.
- **5** Close the lid, and start cooking with the Congee menu.
- Stir the ingredients occasionally to prevent scorching at the bottom of pot.
- Do not reduce the heating time. (Doing so will finish cooking chicken in a raw state.)
- **6** When congee is done, stir ingredients equally in the pot. Flake the chicken with ladle. Season to taste with salt.

Preparation

Measure rice and water correctly.

	Rice	Water
4 servings	170 g (approx. 200 mL)	2.4 L
2 servings	85 g (approx. 100 mL)	1.3 L

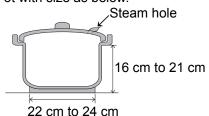

- Either 4 servings or 2 servings can be selected in this menu.
- Do not use hot water.

Drain off water well from washed rice.

Use specified pots.

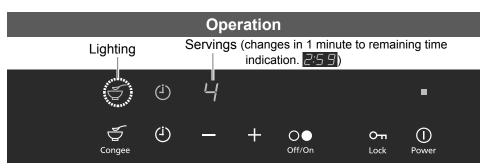

- Stainless steel
- · Lid with a steam hole
- Pot with size as below.

 With pots coated with fluorocarbon resin or enamel, congee may be less thickened.

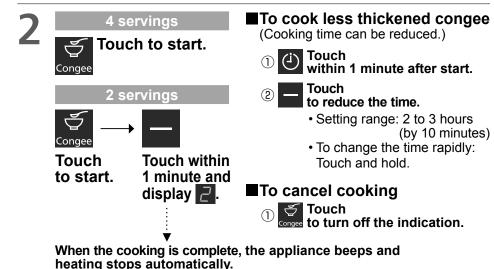

Be sure to close the lid.

When the top plate is hot, wait until it cools down before cooking.

The Congee menu can be used only with the right IH heater.

Touch to turn the power on.

Note

- The number of servings and the time setting can be changed within 1 minute after start. (When is touched, the number of servings and remaining time are switched for display.)
- After 1 minute has elapsed, the number of servings can be checked by touching (4). (Displayed for approx. 10 seconds.)
- If the pot boils over, make a gap between the lid and the pot so that steam can escape through the gap. (For example, place chopsticks between the lid and the pot.)
- When the room temperature is low, congee may be less thickened.
- In the case that the congee is thin, simmer it again at heat level of = to = carefully.

Cleaning

Always keep the appliance clean.

If splattered food or oil become scorched to the appliance, it will be difficult to remove.

Caution

- •Before cleaning, turn off the main power switch and wait for the top plate to cool down.
- •Do not use a steam cleaner. Water may enter the electrical components and cause a malfunction.

Light stains:

Wipe off with a damp cloth.

Oil stains:

Wipe off with a cloth dampened in diluted neutral detergent.

Stubborn stains:

Apply cream cleanser to the top plate and scrape off stains with crumpled plastic wrap.

Note

- Do not use strong acidic or alkaline detergents (bleach, synthetic housing detergents, etc.). They may cause discolouration.
- Be sure to remove stains from the bottom of cookware. Otherwise, the stains will be scorched and stuck on the top plate.
- When using the appliance as free-standing, wipe off oil stains attached both on the front and side of the appliance.

Troubleshooting

Symptom	Probable cause
Power source	
The IH cooktop cannot be turned on.	 The main power switch has not been turned ON. The power switch cannot be easily turned on to preven unwanted power-on in case of accidental operation. →Touch the main power switch slightly long. The "Child safety lock" has been activated.
	• Main power switch auto shutoff If no key is touched for approx. 1 minute in power-on state, the main power automatically turns off. →Turn on the main power switch again.
The IH heater turned itself off while being used.	• Forgotten-OFF auto shutoff If no key is touched for approx. 45 minutes while the II- heater is in operation, a buzzer will sound and the II- heater automatically turns off. →Turn on the main power switch again and restart the operation. *Using the timer is recommended for simmering more than 45 minutes. (P.15)
■Operation panel	
Key operation is	 Your fingertips have bandages or fingerstalls on. You are operating the appliance while holding the cookware handle.

Key operation is disabled.	 Your fingertips have bandages or fingerstalls on. You are operating the appliance while holding the cookware handle. The operation panel is stained. →Turn off the main power switch and remove any foreign objects. Then, turn the main power switch back on.
Keys react even when only their vicinity is touched.	Water or the like is on or around the keys.

Troubleshooting

Symptom	Probable cause
■Sound and noise	
Noise is heard while heating.	 Various resonant sounds may be heard depending on the type of cookware. You may feel small vibration when you hold the handle, or the cookware may slightly move. →This is not a malfunction. Moving the cookware slightly or replacing it may stop the sound.
	 If the cookware is removed while heating, a short metallic sound may be heard.
Even after the main power switch is turned off, noise from the fan is still heard.	The cooling fan is operating because the inside of the appliance is still hot. (As the appliance cools down, it will automatically stop.)

■Heating power

Ineating power	
The heating power of the IH heater seems weaker.	Overheating prevention function If the bottom of the cookware overheats, for example, by preheating too long, the heating power will be reduced automatically without changing the heat level indication. (The heating power returns to normal after the cookware cools down.)
	 Cookware, such as ceramic and earthenware pots, which cause the IH heater to overheat are used. →Do not use ceramic ware and earthenware even if they are made for induction heating.
When both the right and left IH heaters are used simultaneously, • The heating power is reduced or a lower heat level is indicated. • The heat level cannot be increased.	The heating power is automatically controlled so that overall power consumption does not exceed the limit. (P.23) The heat level may decrease automatically. Even after touching +, the level may not increase and the appliance may beep.

Error Indications

If any of the following error indications appears, check the cause and deal with it.

will disappear.

• You can also clear the 📙 📙 error with

(for congee)

	Congee
Indication	Probable cause
니 [] 니	The intake or exhaust vent is clogged with dust, etc. →Remove any blockage.
or ii iii Empty pot auto shutoff	 An empty pot has been heated. →Put ingredients into the pot and touch the key again. * This function may not operate properly depending on the type of pot, or if the heat level is low.
Top plate high temperature detection	 "Congee menu" was used while the top plate is hot. An empty pot has been heated with "Congee menu". →After the top plate cools down, touch the key

again.

Error Indications

If any of the following error indications appears, check the cause and deal with it. After the cause is eliminated, heating resumes automatically.

Indication	Probable cause
Operation keys error detection	 Water or foreign objects are attached on or around the operation panel, or water or ingredients have boiled over. →Remove them. *If the IH heater has been turned off, perform the key operation again. An operation key has been touched for 3 seconds or more. (Except touch-and-hold operations requiring 3 seconds or more of continuous touch, such as rapid change of timer)
(Flashing) Undetected pot auto shutoff Small object auto shutoff	 No pot is placed on the IH heater. The pot has been removed while heating. The pot is not centred on the IH heater. An incompatible pot is used. (P.10) A metal kitchen tool, such as knife or spoon, is placed on the top plate. *If the above conditions are not remedied, the display and the main power will turn off in 1 minute.

■If you cannot resolve the above problems, or any #33 error appears, contact the service centre.

→Turn off the main power switch and breaker. Contact the dealer you have purchased the appliance from or service agent for details concerning the 2-digit number following "H".

Note

• For the service centre contact list, refer to the Guarantee Certificate.

Specifications/IH Cooking Mechanism

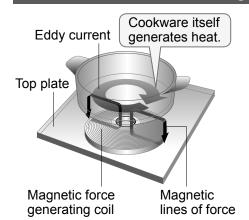

Power supply	Single phase 220 V ~ 50 Hz
Power consumption	2,800 W
Standby power consumption (approx.)	0.8 W *When the main power is off
Dimensions (approx.)	Width 742 × Depth 400 × Height 107 mm
Weight (approx.)	10.4 kg
Heat level adjustment (approx.)	 Left IH heater: 9-level adjustment (120 W to 2,800 W equivalent) Right IH heater: 8-level adjustment (120 W to 1,800 W equivalent)
Congee menu	4 servings or 2 servings
Cooking timer	1 minute to 9 hours 30 minutes

■Using both the right and left IH heaters simultaneously

If both the right and left IH heaters are used simultaneously, the heating power of the IH heaters may be regulated as follows in order to restrict overall power consumption.

- The heat level indication does not change but the heating power weakens.
- The heat level is automatically reduced by one or several levels.
- The heat level cannot be increased.
- →If high heat levels are required, avoid using the right and left IH heaters simultaneously, or reduce the heat level of either of the IH heaters.

IH Cooking Mechanism

IH (electromagnetic induction heating) heats cookware by causing cookware itself to generate heat.

If electricity flows in the magnetic coils underneath the top plate, magnetic lines of force are produced. When the magnetic lines of force pass through metallic cookware, an eddy current is induced, and the heat generated by the electrical resistance of the cookware is used for heating.
