Important

► Before use

This WET/DRY shaver can be used for wet shaving with shaving lather or for dry shaving. You can use this watertight shaver in the shower and clean it in water. The following is the symbol of Wet shaver. The symbol means that the hand-held part may be used in a bath or shower.

Treat yourself to wet lather shaves for at least three weeks and notice the difference. Your Panasonic WET/DRY shaver requires a little time to get used to because your skin and beard need about a month to adjust to any new shaving method.

► Using the shaver

Caution - The outer foil is very thin and can be damaged if not used correctly. Check that the foil is not damaged before using the shaver. Do not use the shaver if the foil etc. is damaged as you will cut your skin.

► Charging the shaver

Do not use any charging adaptor other than one specifically designed for this model (RE7-54). Plug in the adaptor into a household outlet where there is no moisture and handle it with dry hands. The shaver may become warm during use and charging. However, this is not a malfunction. Do not charge the shaver where it will be exposed to direct sunlight or other heat sources.

Adequate ambient temperature for charging is 0-40 °C.

The supply cord cannot be replaced. If the cord is damaged, the appliance should be scrapped.

► Cleaning the shaver

Warning - Remove the shaver from the charging adaptor before cleaning it to prevent electric shock.

If you clean the shaver with water, do not use salt water or hot water. Do not soak the shaver in water for a long period of time. Wipe it with a cloth dampened with soapy water. Do not use thinner, benzine or alcohol.

► Storing the shaver

Remove the shaver from the charging adaptor when storing it. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction

concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance. Keep these operating instructions in a safe place.

The following symbol indicates that a specific detachable power supply unit is required for connecting the electrical appliance to the supply mains. The type reference of power supply unit is marked near the symbol.
